1. **Give an example of your choice, on a successful project that you worked on with a team. What was your role in the team? Additionally, what made the project successful in your view?**

- During my third year in campus one of the requirements was to form a team, identify gap in the society and come up with project. Our team came up with online livestock android based project targeting farmers. Our aim was to provide a wide rage market for the farmers.

- The role I played was to integrate with farmers and get insights of what they really need in terms of selling their livestock and challenges they face in the physical market. As a result I achieved insightful information about the farmers' needs.

- The feedback acquired helped the front end developers in the team build an app that was practical ,scalable and user friendly to the farmers. The project ended up a success because each of the team members played their roles effectively.

2. **What actions and support, in your experience, make a team function successfully?**

   A team to function successfully they need to understand the following actions;

- Team members comes from different backgrounds and each have their own belief and culture and will end up having different interpretation to the objective of the team(diverse).

- Team members will constantly move in different directions according to their own goals unless they come together and have a common goal.

   Team members should have the following support;

- Strong leadership to lead them in the right direction despite their differences.

- They should have a reason of existence to keep them moving forward.

- They should be ready to learn and adopt to different things.

3. **Can you share an example of a situation in this team or any other team, in which teamwork enhanced your ability to accomplish your goals or the outcomes that were expected of you as a team member?**

- I once worked in a team where we all came from different cultural backgrounds and each would come up with great ideas towards the contribution of the team. However when it would come to decision making other were considered minority causing differences among team members. This caused delay in the delivery of the goal.

- The issue was identified and we all encouraged including everyone in the decision making process.

- The fact that now everyone contributed in decision making the goal intended was delivered in the specified time which was my intended goal from the beginning.

4. **Do you feel more energized when you are working alone or when you are working as part of a team and why?**

- I feel more energized working as a team.

- I am both melancholic and phlegmatic person which means I am introverted, dependable, logical, and sensitive.

- I would make a good team player because I am reliable, communicates in a warm way and shows interest in others.

5. **Have you ever been a member of any team that struggled or failed to accomplish its goal? If so, now that you know all these things about teamwork. What do you think were the different things that contributed to the failure?**

- I once worked with a team in developing a online farming mobile based system. We came from different backgrounds and everyone had different

perspective of the goal. It took a long period before we understood the goal causing the delay in deployment of the goal.

- The team identified the challenges which were inattention to result where each focused on their own goal, lack of understanding of the common goal, unequipped leadership and lack of trust among each other.
